SUMMARY

IT support, QA, and DevOps professional who finds problems before users do and fixes them fast when they slip through. Caught issues early across 50+ airline releases at Wipro, and as a DevSecOps intern restored real prices within 12 hours of a production failure and closed a security exposure. M.S. IT Management, Illinois Tech (4.0 GPA).

SKILLS

- **CI/CD & DevSecOps:** GitHub Actions, Docker, Trivy, CodeQL, gitleaks, cosign, branch protection, secrets management
- **Cloud & Infrastructure:** AWS (IAM, CloudWatch, Secrets Manager, EC2), Terraform, Linux, OpenLDAP, Microsoft Entra ID, Active Directory
- **Testing & QA:** pytest, Selenium, pytest-bdd, Playwright, Postman, regression and API testing, JIRA, Azure DevOps, Agile Scrum
- **Languages & Web:** Python, SQL (PostgreSQL, MySQL), TypeScript, React, Next.js, FastAPI, Flask, Django
- **AI & Data:** Local LLMs with Ollama, prompt design with JSON-schema output, Power BI, Tableau, Excel and VBA

EXPERIENCE

DevSecOps Intern **Jun 2026 to Aug 2026**

SupplyBistro (Gusto AI Tech, Inc.) *Chicago, IL (Remote)*

- Kept the engineering team shipping by restoring all 4 environments (Dev, QA, Stage, Prod) after outages and documenting each root cause.
- Restored real prices within 12 hours after the pricing page showed "TBD" by redeploying a stale production container, and closed a DEBUG=True security exposure.
- Audited CI/CD for the CTO, showing most release workflows had never run, and cut data leak risk with an 8-role least-privilege PostgreSQL model and AWS Secrets Manager.
- Protected checkout revenue with a Selenium and pytest-bdd suite that tests product creation, orders, and Stripe payments before release.

Senior Test Project Engineer **Dec 2024 to Aug 2025**

Wipro Ltd. | Client: Qatar Airways (CROAMIS platform) *Bengaluru, India*

- Helped a global airline release safely with zero critical defects across 26+ release cycles, validating data integrity with SQL on PostgreSQL and MySQL.
- Caught problems early, when cheapest to fix, by turning each change request into 100+ test cases with analysts and developers.
- Got new hires contributing faster by training them in a 19-member Scrum team; won Wipro Building Trust and Victory League awards.

Test Project Engineer **Jul 2021 to Nov 2024**

Wipro Ltd. | Client: Qatar Airways (TOPS module) *Bengaluru, India*

- Kept an airline operations application reliable for the client through 50+ releases with functional, regression, and API testing in Postman.
- Freed up team hours every release by automating repetitive Excel checks with VBA, and tracked defects in JIRA and Azure DevOps.

Technology Consulting Virtual Intern **Jun 2020 to Jul 2020**

Deloitte (Virtual Internship Program) *Remote*

- Helped stakeholders track financial performance at a glance with Power BI dashboards, KPIs, and calculated measures, built on raw data I cleaned in Excel.

PROJECTS

HelpDesk Autopilot | Python, FastAPI, PostgreSQL, OpenLDAP, Docker

- Automates IT onboarding and offboarding: new hire accounts in under a second, automatic leaver lockout, and password resets with manager approval and a tamper-proof audit log.

Recipe Scaler | Next.js, React, TypeScript, Vitest, Playwright, GitHub Pages

- Tested a live web app end to end: 330+ unit tests, and 30 Playwright browser tests with accessibility scans, all gating every deploy in CI.

Secure Supply Chain | Python, Docker, Kubernetes, Kyverno, Trivy, CodeQL, cosign

- Stops vulnerable or tampered code from reaching release: scans secrets, dependencies, code, and containers, then signs every image and blocks unsigned ones in Kubernetes.

Honest Fit | Python, FastAPI, Ollama (local LLM), pytest, Docker

- Built an AI tool that compares a resume with a job post on a local model, with a guard that blocks any AI suggestion that adds a skill or number not in the resume.

EDUCATION

Illinois Institute of Technology, Chicago, IL **Expected May 2027**

M.S. in Information Technology Management, MIS Concentration | GPA 4.0/4.0 | Upsilon Pi Epsilon Honor Society | Graduate Student Senator, SGA

University of Engineering and Management, Kolkata, India **May 2021**

B.Tech in Electronics and Communication Engineering | GPA 3.4/4.0
